### Random Acts of Kindness

You may have heard of the book, movie and movement named *Pay It Forward*. The expression challenges people to be their own hero, as well as a (1) **person who sets an example** to others. The idea is that instead of paying back a person for giving you help, you pay it forward by helping others. Many people have (2) **said nice things about** this form of 'spreading the love' for creating communities of (3) **people who help people**.

The concept was actually first used in an ancient Greek play, and later became a personal (4) **charitable** policy of the American President, Benjamin Franklin. He said: 'This is a trick of mine for doing a deal of good with a little money.' Author Robert A. Heinlein developed the concept by publishing a book and founding a society to promote the idea. In his (5) **position** as a (6) **person who helps guide other people** to another author Ray Bradbury, he was able to pass on this concept to him. As a result, Bradbury used the idea in a book, *Dandelion Wine*, in which the main character had the (7) **aim** of paying help forward to others. The concept became a popular movement after the book was adapted to become a successful movie. The positive (8) **view of** the movement grew, and now 70 countries have a Pay it Forward day each year when people (9) **think carefully about** performing random acts of kindness.

Naturally, some people are (10) **untrusting** of the idea and think that some people will take advantage of their goodwill. But next time you have a chance, try to pay something forward. I guarantee you will feel (11) **content** with what you've done. And remember, the more people that take part in these kinds of positive movements, the more (12) **hope** we feel about the world we live in.
