

## A2 Key Part 2

- 1 Read the article in exercise 3 quickly. Which paragraphs ...? (You can tick ✓ more than one.)

	Sai	Evie	Lucas
a are about inventions?			
b are about the future?			
c are about types of transport?			
d say if the inventions will be cheap or expensive?			

- 2 Look at the photos then put the letters in order to make words for inventions.

latbte .....

hglit lubb .....

odner .....

snavat .....

rigfed .....

arosmntpeh .....

liteccre rac .....

nerpitr .....

✓ Exam tip

After reading the texts quickly, look for the information you need to answer each question. After you have found information in one text, check that the other two texts do not have information about the same question. When more than one text has information about a question, decide which one matches it best.

- 3 For each question, choose the correct answer.

## INVENTIONS OF THE FUTURE: OUR IDEAS

### Sai

I think better, cheaper electric cars will be developed. They'll be solar-powered, but they won't need a lot of sun. They'll work well even in rainy countries like the UK! They won't be expensive to produce, so most people will be able to buy one. I hope they'll be popular. If everyone stops using cars that create pollution, it will make a big difference to our planet.

### Evie

Smartphones and tablets aren't very good for reading. The blue light from the screen is bad for your eyes, and it can stop you sleeping. E-readers are much better for reading, but bad for videos and so on. Soon, I think you'll be able to press a button to change your smartphone screen. First it will be like a normal smartphone screen, then it will look like paper. They won't be cheap but everyone will buy them.

### Lucas

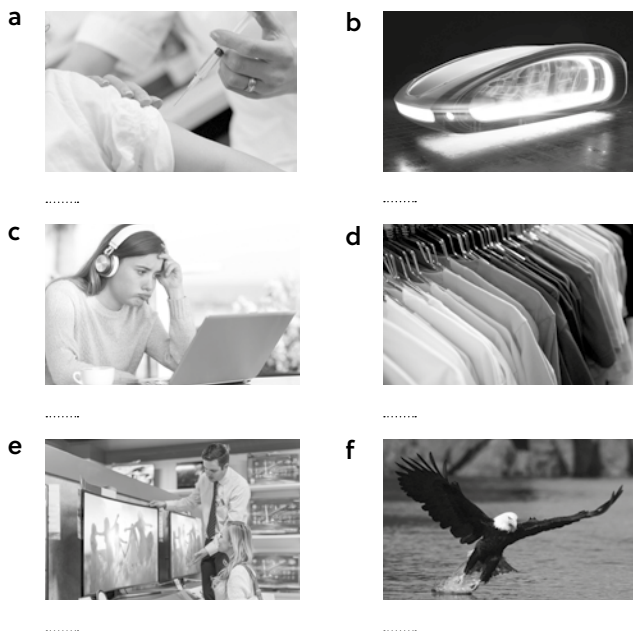

If you're in a city and you need to travel fast, you get a taxi. In the future, I think you'll get a drone instead. There'll be big drones that one or two people can sit in. You'll use an app to say where you want to go, and a drone will arrive for you. I've read that passenger drones have already been invented, but I hope this idea is developed so we see drone taxis in our cities soon. They sound really fun!

- Who has an idea that will help people travel faster?
- Who talks about a problem with devices we have now?
- Who has an idea that will help the environment?
- Who has an idea that will be better for people's eyes?
- Who wants everyone to use the new product?
- Who thinks the new product will probably be expensive?
- Who thinks they will enjoy using the new invention?

## A2 Key Part 1

- 1 Read the six short texts in exercise 3 quickly. Match the photos to the texts (1–6).

- 2 Choose the correct alternative.

- You can find more expression/information about her in the book *Great Inventors and Designers*.
- This article's introduction/decision is very boring. I don't want to read the rest of it.
- Can you give me a description/an inspiration of the man you saw?
- It's a very good essay, but I don't agree with your creation/conclusion.
- We need some good ideas. Use your imagination/organisation!
- I don't know how to use it. Can you give me an action/a demonstration?

Exam tip

In three-option multiple choice activities with short texts, you should read the three options carefully. Check that the option you choose matches the meaning of the text exactly.

- 3 For each question, choose the correct answer.

1

## Design competition

Design the car of the future and win a tablet!  
Open to all aged 12–18.  
See our website for more information.

- If you want to enter the competition, you must design a tablet.
- You can find out more about the competition online.
- People of all ages can enter this competition.

2

No drones near the lake!  
Eagles live here and they don't like drones!  
Be a responsible tourist.

- Tourists mustn't take photos of the eagles.
- It's irresponsible to go near the lake.
- Drones are not allowed here because of the eagles.

3
