- Most the people in our basketball team are tall.
- Unfortunately, there was a little interest in my idea to start a baseball team.
- There are a lot of good places to go climbing in our local area.

5 Choose the best answers to complete the text.

Rob Pardo, (1) is a top video game designer, says video gaming should be included in the Olympics. Video gaming, (2) is also known as e-sport, is a proper sport because it is very competitive and requires very specific skills. Pardo, (3) idea of sport is broader than most people's, agrees that e-sports don't take a lot of physical effort, but, he adds, the same can be said of some of the sports events (4) we watch in the Olympics. In addition, e-sports attract millions of spectators. In Seoul, (5) major e-sports finals often take place, 40,000 people have filled the Sangam Stadium. Having a sport admitted in the Olympics is quite difficult, as chess players have discovered. But Pardo says that video gaming is different from chess, a 'mind' sport (6) has never been allowed in the Olympics, although it needs strategic thinking and quick reactions. However, those (7) disagree with Pardo claim that being a spectator sport is not enough and a very popular sport like cricket is not included in the Olympics. Nor are motor sports, like motor racing (8) also requires excellent reflexes and attracts big crowds. Pardo and his supporters should organise a separate international competition only for e-sports (9) could follow a format like the Olympics and (10) gaming would be the main event, and not simply one of many sports.
