- | | |
|---------------------|------------------|
| 1 deep-sea sponge | <u> b </u> |
| 2 lyrebird | <u> c </u> |
| 3 snow leopard | <u> e </u> |
| 4 cheetah | <u> f </u> |
| 5 rhinoceros beetle | <u> d </u> |
| 6 three-toed sloth | <u> a </u> |

a

b

c

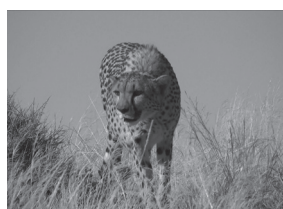

d

e

f

2 Which of the animals in Exercise 1 do you think ...

- | | |
|------------------------------|--------------------------|
| 1 is the strongest? | <u>rhinoceros beetle</u> |
| 2 can jump the farthest? | <u>snow leopard</u> |
| 3 can run the fastest? | <u>cheetah</u> |
| 4 is the slowest? | <u>three-toed sloth</u> |
| 5 lives the longest? | <u>Greenland shark</u> |
| 6 can copy different sounds? | <u>lyrebird</u> |

While you watch

3 Watch the video and check your answers to Exercise 2. Which animal is your favourite? Why? **Students' own answers**

4 Watch again. Complete the sentences with a number.

- A rhinoceros beetle can lift something that is 100 times heavier than its own body weight.
- Snow leopards can jump more than 15 metres.
- Cheetahs can run up to 98 kilometres per hour.
- Three-toed sloths can live up to 16 years.
- The Greenland shark can live for 400 years.

5 Watch again and answer the questions.

- Why are snow leopards good at jumping?
Because they've got very strong legs.
- What does the three-toed sloth do for most of the day?
It sleeps.
- How old are some deep-sea sponges?
They're thousands of years old.
- What kind of food does the Greenland shark eat?
It eats meat or fish (it's a carnivore).
- Where is the lyrebird from?
It's from Australia.

After you watch

6 In pairs, answer the questions.

- Look at the pictures in Exercise 1 again. What can you remember about each animal?
- What other animals appear in the video?
- What was the most interesting fact that you learned from the video? Why?
