While you watch

3 Watch the video and check your answers to Exercise 2. Which animal is your favourite? Why?

7.1

4 Watch again. Complete the sentences with a number.

7.1

- A rhinoceros beetle can lift something that is _____ times heavier than its own body weight.
- Snow leopards can jump more than _____ metres.
- Cheetahs can run up to _____ kilometres per hour.
- Three-toed sloths can live up to _____ years.
- The Greenland shark can live for _____ years.

5 Watch again and answer the questions.

7.1

- Why are snow leopards good at jumping?

- What does the three-toed sloth do for most of the day?

- How old are some deep-sea sponges?

- What kind of food does the Greenland shark eat?

- Where is the lyrebird from?

After you watch

6 In pairs, answer the questions.

- Look at the pictures in Exercise 1 again. What can you remember about each animal?
- What other animals appear in the video?
- What was the most interesting fact that you learned from the video? Why?
