

# 3C YOUR VIEWS ON TECHNOLOGY

Everybody will have a robot at home.	Printed books will disappear and will be replaced by ebooks, tablets, etc.
It's better to learn using apps and videos than using textbooks.	Soon, all devices will be 'smart' – that is, connected to the internet.
People won't need to remember dates, events, etc. Our mobile phones will have all the information.	It's dangerous to depend so much on technology.
All surfaces, like desks, walls, windows, etc., will also be interactive screens.	You will be able to buy anything at all online and it will be delivered immediately to where you are.
Many jobs will be replaced or done by robots.	Your parents should be able to track your phone to see where you are, at any time.

I think (that) ...	What's your view on ... ?	I agree ...
That's right ...	I can't agree ...	In my opinion ...
That's true (but) ...	I disagree ...	That's a good point ...
I'm not sure ...	I'd say (that) ...	I don't think (that) ...
