#### 3 Read and write T (true) or F (false).

##### Pets

A pet is an animal that gives people company and affection. In general, people think that pets are small animals which live with people but this concept is not true.

Pets can be classified differently according to the habitat they live in. Dogs, cats and birds such as canaries are household pets. You can keep reptiles and amphibians as pets, but the requirements are different. They must live in a glass container called vivarium. Very common vivarium pets are snakes, lizards, tortoises and frogs. A lot of people keep fish as aquarium pets. Again, they must be very careful with the quality of the water in a home aquarium because fish can die when the water in the aquarium is not right for them. This is because there are a lot of bacteria in water, some of which can be dangerous to some fish. There is another type of pet: cage or hutch pets. They can live indoors or outdoors. In the case of outdoors, they need protected conditions. These pets include rabbits, guinea pigs, rats, hamsters and chinchillas. There is still another type of pet, the paddock pet. They live outdoors and in a stable. Horses, ponies, donkeys and mules are paddock pets.

- 1 This text is a story.
- 2 This text is very informal.
- 3 This text is part of an encyclopaedia.
- 4 Pets are always small animals.
- 5 There are different types of pets.
- 6 A canary is a household pet.
- 7 Snake pets live in an aquarium.
- 8 Water has got bacteria.
